

New York Is Facing an Energy Affordability Crisis⁴

Assemblyman Ari Brown Breaks Down the Facts

Electricity prices for residential consumers have risen 58.1% since 2019.¹

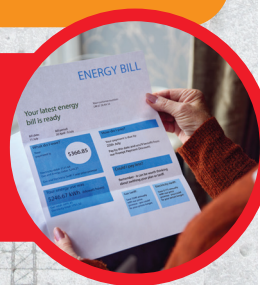

The New York Independent System Operator (NYISO) has expressed concerns about grid reliability in the near future.²

NYSERDA* confirms expenses could exceed more than \$4,100 per household.³

Families and businesses across Long Island are struggling with skyrocketing utility bills.⁵

Assemblyman Ari Brown is supporting common-sense solutions to bring relief to ratepayers, restore energy reliability and protect taxpayers from costly mandates.

This is why I support the LOWER Plan, which would:

- ✓ **Prohibit the future construction of battery energy storage systems** and related facilities on Long Island. (A.8328)
- ✓ **Return unused NYSEDA funds to ratepayers (A.8876-A)**
Sends surplus state energy funds back to residents as **utility bill credits**, helping lower monthly energy costs.
- ✓ **Allow school districts to opt out of the zero-emission bus mandate (A.2005)**
Gives local schools **flexibility to avoid costly mandates**, helping protect school budgets and local taxpayers.
- ✓ **Protect access to natural gas and other heating options (A.6796)**
Ensures homeowners and businesses can **continue using affordable heating systems**, preventing forced and expensive upgrades.
- ✓ **Require notice when energy supply rates spike (A.1270)**
Requires utilities to **alert customers when rates jump significantly** and connect them with bill assistance programs.
