- The proposed "All-Electric Building Act" (A.920) would require new buildings and equipment in those buildings to be powered by electricity rather than fossil fuels - the idea being that electricity would be generated by fossil free technologies (hydro, solar, wind, wave, hydrogen, etc.). The legislation would only apply to new buildings under seven stories high, beginning in 2025. Larger buildings would fall under the legislation in 2028. Do you support this legislation?
 Yes No
- Do you agree with the governor's proposal to implement a Cap-and-Invest Program that would limit greenhouse gas emissions and share revenue with New Yorkers from disadvantaged communities to help cover utility bills, transportation costs and decarbonization? The program is expected to help the state meet the requirements of cutting greenhouse gas emissions 40% by 2030 and at least 85% by 2050.
 Yes No

The legislation contains safeguards to ensure that only terminally ill patients themselves can request aid in dying medication, that their decision is fully informed, and legally protects health care professionals. Do you support NYS passing of this legislation?
 Yes No
- The governor recently announced a comprehensive plan and a proposed \$1 billion investment to overhaul New York's continuum of mental health care and drastically reduce the number of individuals with unmet mental health needs throughout the state.
