

INVESTING IN AGRICULTURE = PRESERVING OUR WAY OF LIFE

So far this year, I've proudly supported legislation that:

- ◆ Invests in local food hubs and processing infrastructure (A.3623)
- ◆ Cuts red tape/regulations for agriculture-related businesses and young farmers entering the industry (A.3623)
- ◆ Secures funding for farmland preservation and conservation programs (A.7607)
- ◆ Supports workforce development and training in ag tech and sustainable practices (A.3623)
- ◆ Restricts foreign governments and their citizens from acquiring our farmland (A.1452)
- ◆ Protects farmland from being bought and sold for massive solar and wind farms, which don't benefit us locally (A.6260)

STRENGTHENING OUR RURAL ECONOMY:

A thriving agricultural world means stronger rural communities. This is why I'm working to:

- ◆ Get roads, bridges, and broadband rebuilt (A.2378)
- ◆ Expand tax credits for small rural producers (A.3221)
- ◆ Ensure state programs recognize the unique needs of rural areas (A.1913)

"I want to make sure New York's policies support the farmers, producers, and small business owners who are the backbone of our community."

-Assemblywoman Andrea Bailey
