## Questions?

# On the State Level

## NYS Office of Mental Health (OMH), Flexible Assertive Community Treatment (ACT) for Adults

The Flexible ACT teams will serve individuals who have serious mental illness (SMI) and who have not been successfully engaged by the traditional mental health treatment system. Flexible ACT builds on the evidence-based model of ACT by enhancing flexibility in the delivery of ACT services, tailored to meet an individual's changing needs. The addition of Flexible ACT represents a commitment by the NYS OMH to ensure mental health services evolve to better meet the needs of the SMI population most disengaged in care.
